SAT: 1480 (790 Math, 690 Reading)
Honor Roll

Communication

I have worked with a team in many of my personal hobbies and projects. I am currently in a robotics team that was very successful this year and last year. In 2017, my robotics team was able to enter the World Championship in Houston as a team full of new members. Additionally, I also hold a Black Belt in Tae-Kwon-Doe, where I had to work with many of my peers and sensei to plan out different events and performances in local parades and fairs.

Leadership

I am the co-captain and software head of my robotics team, where I manage the building, wiring, and coding of the robot. Additionally, I was a head student for my Tae-Kwon-Doe dojo for about 4 years. I managed classes and taught many students, ranging from young kids to students in their mid-60s.
